## PRINCIPAL'S MESSAGE

---

This year our school has been fortunate to have a Do Something Project. The title of the group is also my message to you. As you leave Malcolm X. Shabazz High School, I urge you to be determined to Do Something positive with your life. Although you should feel very proud of your accomplishments to date, you have much more to do for yourself, your family and your community.

As you live your life, there will be obstacles and challenges that confront you daily. Do Something positive when the negative occurs. There will be people who think you will not succeed, Do Something to push yourself towards success.

It has been an honor to serve as your principal during your Shabazz years.

SADLY, WE BID A FOND FAREWELL TO MEMBERS OF THE MALCOLM X SHABAZZ FAMILY WHO HAVE PASSED AWAY. WHILE THEIR PHYSICAL PRESENCE HAS MOVED ONWARD WE WILL ALWAYS FEEL THEIR SPIRITUAL STRENGTH AND LOVE FOREVER. WE THANK YOU FOR YOUR MANY YEARS OF SERVICE, DEDICATION AND EMOTIONAL GIFTS. WE, THE CLASS OF 1997, PRAY THAT YOUR JOURNEY HOME BE PEACEFUL. GOD BLESS YOU.

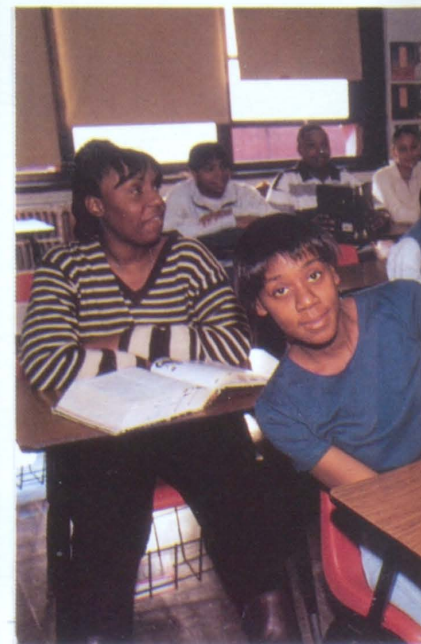

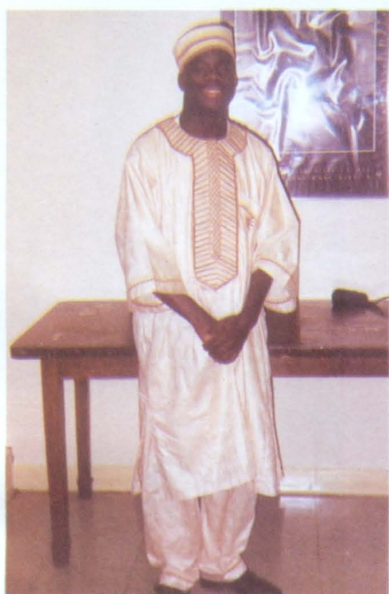

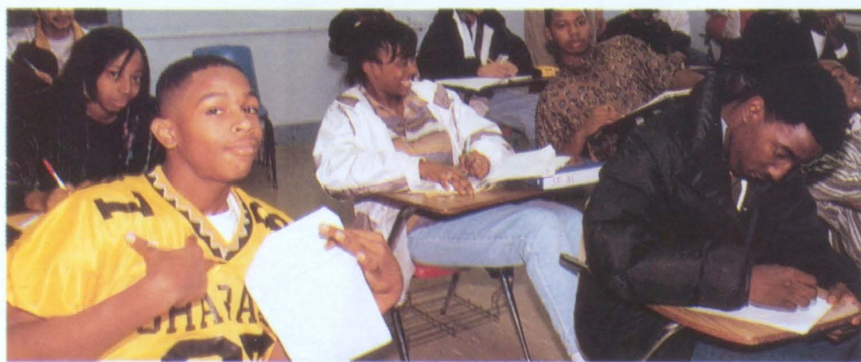

**Welcome** We the graduating **Class of 1997** wish to invite you to travel with us as we review our Senior Year. It has been a journey filled with both sunny and cloudy days, good times and sad times; times of laughter as well as tears. We have gained many new friends and lost a few along the way. Nevertheless, it was our journey and we would not trade our experiences for anything. We wish to thank all who helped us along this path. So, we say to our parents, teachers, family and friends — **we are proud to call ourselves Bulldogs.**

# Science

Every day each of us eats, breathes and functions as part of the world around us. The Science program at Shabazz helps students to understand what is happening in our bodies, in the environment around us, and in the world. From the smallest organism, looked at through a microscope, to the whole universe, looked at through a telescope, science covers it all. In Physical Science and Biology students learn the basics of nature and our world. In Chemistry and Physics students have the opportunity to further explore nature. In all science classes there is an emphasis on real life situations, utilizing hands-on activities as often as possible. It is our goal to have each student leave Shabazz with a better understanding of our world and the part he or she plays in it.

"The task is simply to enjoy one's work, doing what we love to do. The results are outside our realm and may be other than our conscious intent. As long as we are working with joy, we cannot help but create the positive good in the world. What else is important?"

In level two, students' vocabulary and grammar base are expanded. Oral and written usage of the language is emphasized. We endeavor to provide each student with the ability to understand the languages and to use them with confidence and accuracy.

Our goal is to provide and develop an atmosphere that will provide for the learning, the appreciation and the enjoyment of music.

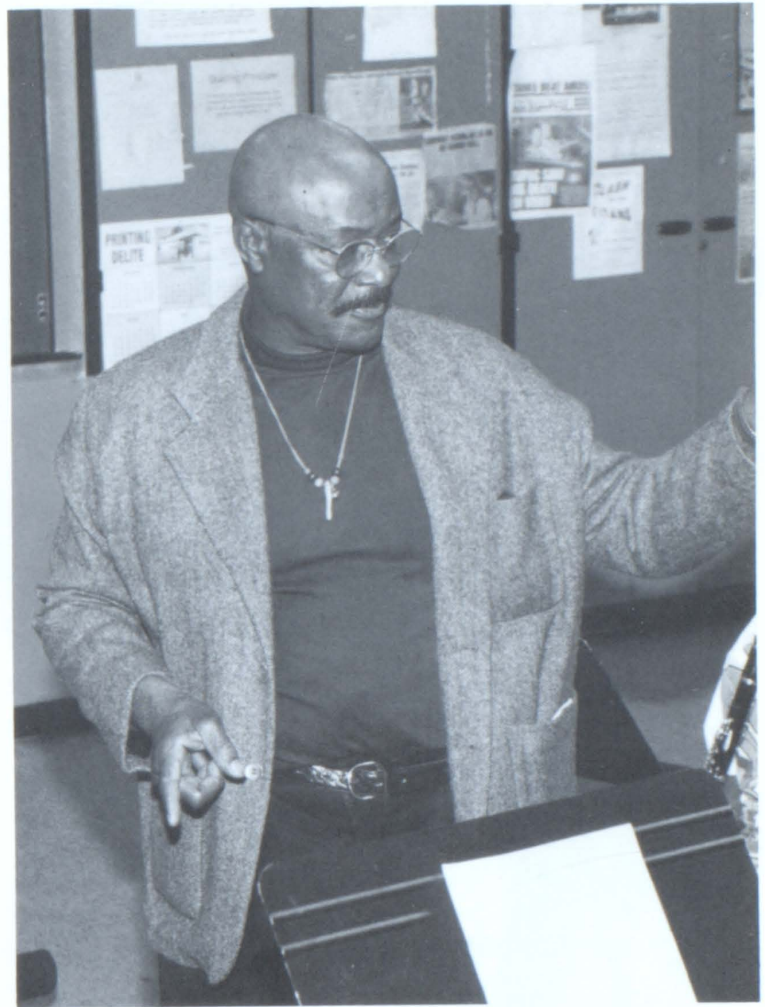

The Art program at Malcolm X Shabazz challenges each student to discover and explore his or her talents. The goal is to enable students to realize their own potential while developing an understanding of and appreciation for art. Students work with a variety of materials in creating their own art work. In most cases art projects are related to the lives of the students. Drawings, paintings and posters enable students to organize their thoughts and express their feelings about current topics. The study of form gives them a better understanding of the human body and the various aspects that make each of us unique. Art gives voice to our heart and soul. There is an artist inside each of us.
